I am a self-motivated and committed individual who dedicates and prides myself in everything that I do. Being friendly and a fast learner, enables me to adapt to new environments quickly. I am highly efficient in front of a computer, an open minded positive thinker who always looks forward to a challenge, I have recently earned a Bachelor of Science degree in Computing. I am very excited to pursue a career as a software developer. I have gained valuable experience working in the IT industry for the past five years, which has allowed me to develop a deep understanding of technology and how it can be used to solve real-world problems.

In addition to my work experience, I also run a healthy self-freelancing business where I create professional business websites for local clients. This has taught me the importance of customer service and the value of delivering high-quality work on time and on budget.

As an aspiring software developer, I am committed to staying up-to-date with the latest technologies and tools. I am passionate about creating software that is user-friendly, efficient, and scalable. I believe that the key to success in this field is to be a lifelong learner and to continually seek out new challenges and opportunities for growth.

Overall, I am excited about the future of computing and the role that software development will play in shaping it.
